

Newfound Energies is proud to announce that we are now a distributor for Ampair wind turbines!

Ampair may be new to us, but with 40-years experience in the wind industry, their knowledge and experience has made their line of micro wind/water turbines the most reliable and durable in the industry. With over 30,000 systems sold, their track record has been recognized all over the world.

See our introductory promotional pricing below on selected models.

### Ampair 100

- Compact design makes it the most reliable/rugged unit available.
- Unique design prevents ice buildup
- 6 Polypropylene blades
- Start up wind speed of 10.8 km/h
- Marine environment ready with stainless steel hardware and powder coating
- Maintains safe and continuous power out put, even with storm force winds
- Built in rectifier
- Charge controller and tower adaptor included
- 12/24/48VDC available

Price: \$1595\*

## Ampair 300

- Uses "PowerFurl" pitch control technology (More efficient than electronic braking)
- Continues to generate power at high speeds
- Smallest turbine made with blade pitch control
- Aerofoil design minimizes noise
- 3 Fiberglass reinforced polypropylene blades
- Start up wind speed of 10.8 km/h
- Marine environment ready
- One piece "Unibody" design
- Charge controller and tower adaptor included
- 12/24/48VDC available

Price: \$2695\*

## Ampair 600

- Exceptional performance in all wind speeds
- Uses "PowerFurl" pitch control technology (More efficient than electronic braking)
- Continues to generate power at high speeds
- 3 Fiberglass reinforced polypropylene blades
- Start up wind speed of 10.8 km/h
- Marine environment ready
- Sealed joints in all castings
- Remote monitoring capability
- Charge controller and tower adaptor included
- 24/48VDC and grid connection available

Price: \$3795\*
